

MERCY -- Drone footage shot list

Generated from services/city-map/photos.json on 2026-09-18: 28 sets, 65 frames (56 AI-generated, 9 stock). Sizes: 1600x900 landscape JPEG, ~200-400 KB.

What these frames are for

After every drone search on the City Map the map shows two to four "drone photos" of what the drones saw: an aerial frame, a thermal frame, a ground-level or detail frame. This document lists every frame the game needs, with the caption the participant reads under it and either the full AI prompt to generate it or a description of what to find on a stock-photo site.

Story-specific frames (the four SOS sites, Kettle Hill, the six vehicle stops) are AI-generated. The generic sweeps (any other building, open ground, the two decoy caves) are ordinary night drone shots that can be found online.

Where the files go

Every frame has a fixed path under **services/city-map/public/images/drone/**. The server reads **services/city-map/photos.json** and nothing else, so the file name is the contract: save the finished image at exactly the path printed for it, replacing the placeholder that is there now. The placeholders come from **scripts/make_placeholders.py**, which never overwrites an existing file, so real footage survives re-runs.

Which set the participant sees

The server picks a set by key, in this order: the exact story spot (sos-1 to sos-4, kettle-north-face, kettle-cave-sealed, kettle-cave); for the six vehicle stops the place frames (stop-N, shown for both outcomes) followed by the outcome frames (stop-N:clear or stop-N:found); for anything else generic:building, generic:coords or generic:cave.

Rules that every frame must keep

No people and no faces anywhere. The only exception is the single thermal frame in each "found" set, which shows exactly one human heat signature indoors: a bright, blurred, featureless shape with no face, no clothing and no identifying detail. The drones see heat, not a person. Captions are fixed by the manifest and never state anything the search result text does not; do not change a caption without changing the result text it belongs to.

AI base prompt -- append this paragraph to every AI prompt below

This is a real photograph captured tonight by a police surveillance drone over the city of Meridian, not a render, not an illustration, not a game screenshot. Night, between 22:00 and 05:00, overcast, no moon. Drone point of view only: aerial frames from 30 to 60 m looking down at a steep angle, ground and detail frames from a small quadcopter hovering at 0.5 to 2 m with its own hard white LED lamp as the key light. Consumer-drone image quality: 24 mm equivalent, high ISO, fine luminance grain, slight chromatic fringing on highlights, mild

vignette, a little motion softness at the edges. Colour: cold and desaturated, the drone lamp white, any street lighting sodium amber or cold LED, everything outside the beam falling to true black. Mood: forensic, quiet, unsettling. Absolutely no people or faces (a single heat blob in a found thermal frame is the only exception), no text, no captions, no timestamps, no watermarks, no logos, no readable signs or number plates, no HUD or crosshair, no daylight, no dawn.

Thermal note -- applies to every frame of kind "thermal"

Thermal frames are long-wave infrared from the drone's FLIR-style camera in a white-hot palette: hottest surfaces pure white, warm mid-grey, cold near black, no false-colour rainbow. Soft edges and low resolution, as if a 640x512 sensor was upscaled, gentle vignette, slight noise. Timestamp-free: no on-screen data, no reticle, no temperature scale, no crosshair. A found frame shows exactly one human heat signature: a bright, blurred, featureless human-sized shape lying or curled, with no face, no clothing detail, no identifying feature of any kind -- the drones see heat, not a person. Clear and generic thermal frames show no human signature at all; warm machinery (boilers, compressors, HVAC, a torch bulb) is fine.

sos-1 -- St Aldric's churchyard (SOS 1)

services/city-map/public/images/drone/sos-1/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: St Aldric's churchyard, from 40 m. The lych-gate lane. No people.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: a small stone church and its walled churchyard, gravestones as pale shapes in dark grass, a narrow gravel lane leading to a timber lych-gate with a pitched roof, one sodium street lamp beyond the wall casting orange light, the drone spotlight a soft white circle on the gravel where two faint tyre tracks are visible. Mood: still, empty, cold. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-1/02-ground.jpg

02 kind: **GROUND** source: ai

Caption: Tyre marks in the gravel of the lych-gate lane: one car, in and out.

AI PROMPT:

Real photograph from a small police drone hovering at about 1.5 m, 24 mm equivalent lens, night. Lit only by the drone's own white LED lamp: a hard-edged pool of light with deep black falloff, high ISO grain, faint dust drifting in the beam. In frame: a gravel lane between low stone walls leading to a timber lych-gate, two sets of tyre impressions pressed into damp gravel, one arriving and one turning, gravel scattered at the turn. The gate and the churchyard behind it dissolve into darkness. Mood: forensic, quiet. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-1/03-detail.jpg

03 kind: **DETAIL** source: ai

Caption: In the storm drain by the gate: a phone, screen shattered, SIM tray empty.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a cast-iron storm drain grate set in kerb stones beside a gate post, and wedged just below the grate a modern smartphone in a patterned case, face up, screen spider-cracked, its SIM tray slot open and empty, wet leaf litter and grit around it. Mood: found evidence, cold light. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

sos-2 -- Auditorium service yard (SOS 2)

services/city-map/public/images/drone/sos-2/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: Auditorium service yard, south side, from 40 m.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: the back of a large modern auditorium, a concrete service yard with a roller shutter, a fire door with a single caged bulkhead light, a row of steel bollards at the yard entrance, wheelie bins along one wall, wet tarmac reflecting one amber lamp, the drone spotlight on the yard entrance. Mood: deserted, industrial. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-2/02-detail.jpg

02 kind: **DETAIL** source: ai

Caption: Fresh paint transfer on the entrance bollard, silver-grey. A car left here fast enough to clip it.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a black steel bollard about knee height with a fresh scrape at bumper level, a smear of silver-grey metallic car paint on the black, bright chips of paint on the tarmac at its foot, the yard entrance kerb behind it. Mood: forensic close-up, harsh light. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-2/03-detail.jpg

03 kind: **DETAIL** source: ai

Caption: By the fire door: a woman's sandal, strap torn.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a grey steel fire door with a push bar and a caged bulkhead lamp above it, and on the wet concrete step a single flat woman's sandal lying on its side, its ankle strap torn through, a few grit stones around it. Nothing else on the step. Mood: abandoned, stark. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI

or render look, no illustration, no HUD overlay.

sos-3 -- Veterinary Hospital (SOS 3)

services/city-map/public/images/drone/sos-3/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: Veterinary Hospital, from 40 m. The side door to the pharmacy store.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: a two-storey veterinary hospital with a car park and an ambulance bay, dark windows, one lit entrance canopy, a narrow side alley with a single plain door under a wall light, a wheelie bin, chain-link fence, the drone spotlight marking the side door. Mood: clinical, deserted. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-3/02-detail.jpg

02 kind: **DETAIL** source: ai

Caption: The side door to the pharmacy store is forced; the frame is split at the latch.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a plain painted steel-faced door standing a few centimetres open, the timber frame splintered and split at the latch plate, fresh pale wood showing under the paint, a bent strike plate, pry marks, a strip of interior light through the gap. Mood: break-in, forensic. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-3/03-detail.jpg

03 kind: **DETAIL** source: ai

Caption: The drug register is open on the bench. The cabinet is short one bottle of xylazine.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a pharmacy store bench under a fluorescent tube, a hardback controlled-drug register lying open with handwritten columns that are blurred and illegible, and behind it a steel drugs cabinet with its door open, shelves of glass vials and bottles in neat rows with one obvious gap in a row. Mood: something taken, cold light. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

sos-4 -- Eco-Park (SOS 4)

services/city-map/public/images/drone/sos-4/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: Eco-Park, the loop road by the pond, from 40 m. No people.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: a dark park with a loop road curving past a black pond edged with reeds, a low gate on the road, dense tree canopy, a timber lookout tower rising above the trees on the far side, no lamps, only the drone spotlight on the gate and a faint city glow on the horizon. Mood: black water, silence. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-4/02-ground.jpg

02 kind: **GROUND** source: ai

Caption: Tyre marks on the verge at the gate.

AI PROMPT:

Real photograph from a small police drone hovering at about 1.5 m, 24 mm equivalent lens, night. Lit only by the drone's own white LED lamp: a hard-edged pool of light with deep black falloff, high ISO grain, faint dust drifting in the beam. In frame: a low steel park gate across a single-lane road, and beside it the grass verge churned by a car's tyres, two muddy ruts cutting across the grass and back onto the tarmac, wet mud shining in the drone light, trees black behind. Mood: forensic, damp. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-4/03-detail.jpg

03 kind: **DETAIL** source: ai

Caption: In the reeds at the water's edge, her tote bag, open: wallet, keys, a hair clip, pond water in everything.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a canvas tote bag lying open and half-sunk among reeds at a pond edge, black water around it, inside and spilling out a wallet, a ring of keys and a hair clip, everything wet and streaked with pond water and algae. Mood: dropped, sodden, quiet. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/sos-4/04-detail.jpg

04 kind: **DETAIL** source: ai

Caption: Cigarette ends on the top rail of the lookout tower. The driver stood here a while, looking at the city.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: the weathered timber handrail at the top of a park lookout tower, four or five cigarette ends crushed on the rail top with a little ash, and beyond the

rail a blurred night view of distant city lights through the treetops. Mood: someone waited, cold. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

kettle-north-face -- Kettle Hill, north face -- clear

services/city-map/public/images/drone/kettle-north-face/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: Scree and thorn, north face of Kettle Hill. Searched 60 m around the fix: nothing.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: a steep bare hillside, loose grey scree and low thorn scrub, no path, no buildings, no lights, the drone spotlight a hard white circle on rock and gravel, the slope falling away into black. Mood: empty, hostile ground. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/kettle-north-face/02-thermal.jpg

02 kind: **THERMAL** source: ai

Caption: Thermal, 60 m around the fix: nothing.

AI PROMPT:

Real thermal (long-wave infrared) frame from a police drone's FLIR-style camera, white-hot palette: hot surfaces bright white, warm surfaces mid-grey, cold surfaces near black, no false colour. Soft edges and slight blur typical of a 640x512 thermal sensor upscaled, gentle vignette, faint sensor noise, no overlay of any kind. In frame: a steep rocky hillside from above, uniform cool grey rock and scree, a few slightly warmer boulders as dim grey shapes, thorn scrub as faint texture, no hot spots at all, no human signature. Mood: nothing here. **NEGATIVE:** no face, no facial detail, no identifying features, no clothing detail, no second person; no text, no crosshair, no reticle, no temperature scale, no timestamp, no watermark, no logo; no visible-light colour, no rainbow palette, no daylight; no illustration or render look.

kettle-cave-sealed -- Kettle Hill cave, sealed -- the drones do not enter

services/city-map/public/images/drone/kettle-cave-sealed/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: Cave mouth, north face of Kettle Hill. The interior is unlit and out of line of sight.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: a rocky hillside with a low dark cave opening in a band of grey rock, scree fanning out below it, thorn scrub either side, the drone spotlight on the rock above the entrance while the opening itself stays absolute black. Mood: a mouth in the hill, forbidding. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable

signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/kettle-cave-sealed/02-thermal.jpg

02 kind: **THERMAL** source: ai

Caption: Thermal at the entrance: nothing. The drones do not enter a structure without cause.

AI PROMPT:

Real thermal (long-wave infrared) frame from a police drone's FLIR-style camera, white-hot palette: hot surfaces bright white, warm surfaces mid-grey, cold surfaces near black, no false colour. Soft edges and slight blur typical of a 640x512 thermal sensor upscaled, gentle vignette, faint sensor noise, no overlay of any kind. In frame: a cave entrance in a rock face seen from a hovering drone, the rock uniform cool grey, the opening a flat black void with no gradient, scree below slightly lighter grey, no hot spots, no human signature anywhere. Mood: sealed, cold. **NEGATIVE:** no face, no facial detail, no identifying features, no clothing detail, no second person; no text, no crosshair, no reticle, no temperature scale, no timestamp, no watermark, no logo; no visible-light colour, no rainbow palette, no daylight; no illustration or render look.

kettle-cave -- Kettle Hill cave, interior -- trace

services/city-map/public/images/drone/kettle-cave/01-ground.jpg

01 kind: **GROUND** source: ai

Caption: Cave, Kettle Hill, north face. Two drones inside. No one.

AI PROMPT:

Real photograph from a small police drone hovering at about 1.5 m, 24 mm equivalent lens, night. Lit only by the drone's own white LED lamp: a hard-edged pool of light with deep black falloff, high ISO grain, faint dust drifting in the beam. In frame: the inside of a natural rock cave, uneven stone floor with grit and dust, damp walls, a second small quadcopter's lamp visible ahead as a white glare with lens flare, the cave narrowing into darkness beyond, and low on the floor two small dark objects just at the edge of the light. Mood: torch-lit, claustrophobic. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/kettle-cave/02-detail.jpg

02 kind: **DETAIL** source: ai

Caption: On the floor six metres past the light: her grey jacket -- folded, not dropped.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a woman's grey zip-up jacket folded neatly into a square and placed on a flat rock on a cave floor, the zip pull catching the light, dust and grit around it, the damp rock wall behind. Deliberately placed, not fallen. Mood: staged, unsettling. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/kettle-cave/03-detail.jpg

03 kind: **DETAIL** source: ai

Caption: Her PulseFit band, strap cut, 3% battery.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a slim black fitness band with a small dark screen lying on a cave floor beside a folded grey jacket, its silicone strap cut cleanly through, the two ends splayed, a faint dim glow on the screen with nothing readable on it, grit and dust around it. Mood: cut loose, evidence. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

stop-1 -- Vehicle stop 1, Northwind Campus -- place frames (both outcomes)

services/city-map/public/images/drone/stop-1/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: Northwind Campus, from 40 m. The car park under Block B.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: a corporate office campus, a glass-and-concrete office block with a few lit floors, a barrier gate with a camera pole at the entrance, a concrete ramp curving down under the building into an underground car park lit by a strip of cold white light, a mostly empty surface car park. Mood: corporate, after hours. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/stop-1/02-ground.jpg

02 kind: **GROUND** source: ai

Caption: Basement level. The print room is a dead zone for the campus cameras and its door locks from outside.

AI PROMPT:

Real photograph from a small police drone hovering at about 1.5 m, 24 mm equivalent lens, night. Lit only by the drone's own white LED lamp: a hard-edged pool of light with deep black falloff, high ISO grain, faint dust drifting in the beam. In frame: a basement corridor in an office building, painted breeze-block walls, exposed cable trays and pipes on the ceiling, a plain door with a blank sign panel and a keycard reader glowing beside it, a security camera on the corridor ceiling pointing the other way, flickering fluorescent light. Mood: back-of-house, unwatched. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

stop-1:clear -- Vehicle stop 1, Northwind Campus -- outcome: clear

services/city-map/public/images/drone/stop-1-clear/01-detail.jpg

01 kind: **DETAIL** source: ai

Caption: Inside: nothing. A chair against the wall. He checked a place. He did not use it.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a small windowless basement print room, a large photocopier under a dust sheet, shelves of paper reams, a bare concrete floor, and a single office chair pushed against the far wall. Empty room. Mood: checked, unused. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/stop-1-clear/02-thermal.jpg

02 kind: **THERMAL** source: ai

Caption: Thermal, print room: no trace of her.

AI PROMPT:

Real thermal (long-wave infrared) frame from a police drone's FLIR-style camera, white-hot palette: hot surfaces bright white, warm surfaces mid-grey, cold surfaces near black, no false colour. Soft edges and slight blur typical of a 640x512 thermal sensor upscaled, gentle vignette, faint sensor noise, no overlay of any kind. In frame: a small windowless room from the doorway, cool grey walls and floor, a photocopier as a slightly warmer rectangle, a chair against the wall as a dim outline, no human signature, no hot spots. Mood: empty. **NEGATIVE:** no face, no facial detail, no identifying features, no clothing detail, no second person; no text, no crosshair, no reticle, no temperature scale, no timestamp, no watermark, no logo; no visible-light colour, no rainbow palette, no daylight; no illustration or render look.

stop-1:found -- Vehicle stop 1, Northwind Campus -- outcome: found

services/city-map/public/images/drone/stop-1-found/01-thermal.jpg

01 kind: **THERMAL** source: ai

Caption: Thermal, print room: one person, alive, on the floor by the far wall.

AI PROMPT:

Real thermal (long-wave infrared) frame from a police drone's FLIR-style camera, white-hot palette: hot surfaces bright white, warm surfaces mid-grey, cold surfaces near black, no false colour. Soft edges and slight blur typical of a 640x512 thermal sensor upscaled, gentle vignette, faint sensor noise, no overlay of any kind. In frame: a small windowless room from the doorway, cool grey walls and a photocopier as a warmer rectangle, and on the floor along the far wall a single bright white-hot human heat signature lying on its side, curled, blurred and featureless, a faint warm halo on the floor around it. One person only. Mood: located. **NEGATIVE:** no face, no facial detail, no identifying features, no clothing detail, no second person; no text, no crosshair, no reticle, no temperature scale, no timestamp, no watermark, no logo; no visible-light colour, no rainbow palette, no daylight; no illustration or render look.

services/city-map/public/images/drone/stop-1-found/02-detail.jpg

02 kind: **DETAIL** source: ai

Caption: Under his own office, behind a door that only locks from outside.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: the outside of a plain basement door in a breeze-block corridor, a heavy sliding bolt and a padlock hasp fitted on the corridor side at chest height, no handle on the inside visible through the gap, fluorescent light. Mood: a cell, not a room. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable

signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

stop-2 -- Vehicle stop 2, Meridian Stadium -- place frames (both outcomes)

services/city-map/public/images/drone/stop-2/01-aerial.jpg

01 kind: **AERIAL** source: ai

Caption: Meridian Stadium, east service gate, from 40 m.

AI PROMPT:

Real drone photograph, not a render. Night, roughly 03:00, overcast, no moon. Police quadcopter at 40 m altitude, 24 mm equivalent lens, wide aerial frame looking down at about 60 degrees, high ISO with visible fine luminance grain, slight motion softness at the frame edge, the drone's own white spotlight as the key light, everything outside it falling to black. In frame: a large modern stadium, the curved east stand with its roof cantilever, floodlight masts dark, a chain-link service gate in the perimeter fence with a service road behind it, a few security lamps on the stand's back wall, an empty coach park. Mood: vast and empty. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

02 kind: **DETAIL** source: ai

Caption: The padlock has been cut and hung back on the hasp.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a chain-link service gate, a heavy brass padlock hanging on the hasp with its shackle cut clean through by bolt cutters, bright metal at the cut, the chain draped through the mesh, wet concrete below. Mood: forced entry made to look shut. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

stop-2:clear -- Vehicle stop 2, Meridian Stadium -- outcome: clear

services/city-map/public/images/drone/stop-2-clear/01-ground.jpg

01 kind: **GROUND** source: ai

Caption: Under the east stand: a first-aid room with the cot stripped. No one.

AI PROMPT:

Real photograph from a small police drone hovering at about 1.5 m, 24 mm equivalent lens, night. Lit only by the drone's own white LED lamp: a hard-edged pool of light with deep black falloff, high ISO grain, faint dust drifting in the beam. In frame: a small first-aid room under a stadium stand, painted concrete walls, a green first-aid cabinet, a wall sink, a metal-framed treatment cot with its mattress bare and the bedding stripped off, a single ceiling light. Empty room. Mood: cleared out. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

services/city-map/public/images/drone/stop-2-clear/02-thermal.jpg

02 kind: **THERMAL** source: ai

Caption: Thermal, under the east stand: no trace of her.

AI PROMPT:

Real thermal (long-wave infrared) frame from a police drone's FLIR-style camera, white-hot palette: hot surfaces bright white, warm surfaces mid-grey, cold surfaces near black, no false colour. Soft edges and slight blur typical of a 640x512 thermal sensor upscaled, gentle vignette, faint sensor noise, no overlay of any kind. In frame: a bare first-aid room seen from the door, cool grey walls, a treatment cot as a cold dark rectangle, a sink and cabinet as faint outlines, no human signature, no hot spots. Mood: empty. **NEGATIVE:** no face, no facial detail, no identifying features, no clothing detail, no second person; no text, no crosshair, no reticle, no temperature scale, no timestamp, no watermark, no logo; no visible-light colour, no rainbow palette, no daylight; no illustration or render look.

Caption: Thermal: one person, alive, under a blanket by the boiler.

AI PROMPT:

Real thermal (long-wave infrared) frame from a police drone's FLIR-style camera, white-hot palette: hot surfaces bright white, warm surfaces mid-grey, cold surfaces near black, no false colour. Soft edges and slight blur typical of a 640x512 thermal sensor upscaled, gentle vignette, faint sensor noise, no overlay of any kind. In frame: a small store room from the door, cool grey shelves, a wall boiler as a bright warm rectangle, and on the floor beneath it a single human heat signature lying curled, seen as a soft white-grey glow through a blanket that muffles it, blurred and featureless, no other warmth. One person only. Mood: located. **NEGATIVE:** no face, no facial detail, no identifying features, no clothing detail, no second person; no text, no crosshair, no reticle, no temperature scale, no timestamp, no watermark, no logo; no visible-light colour, no rainbow palette, no daylight; no illustration or render look.

services/city-map/public/images/drone/stop-6-found/02-detail.jpg

02 kind: **DETAIL** source: ai

Caption: A chapel that opens twice a week, on the far side of the city from anyone who would look.

AI PROMPT:

Real close-up photograph from a small police drone hovering within a metre of the subject, 24 mm equivalent lens, night. Lit by the drone's white LED lamp from just above the camera: hard shadows, a shallow pool of light, black beyond it, high ISO grain, mild chromatic fringing. In frame: a heavy wooden vestry door with an old iron lock, the key turned in it from the outside, a worn stone step and a doormat below, the drone lamp raking across the grain of the wood, black night beyond the doorway. Mood: closed to the world. **NEGATIVE:** no people, no faces, no bodies, no silhouettes; no text, no captions, no timestamps, no watermarks, no logos, no readable signs, no number plates; no daylight, no sunrise, no blue-hour sky; no CGI or render look, no illustration, no HUD overlay.

generic:building -- Generic -- any other building

services/city-map/public/images/drone/generic-building/01-aerial.jpg

01 kind: **AERIAL** source: stock

Caption: Aerial pass, 60 m around the point.

STOCK -- search for:

Search: drone aerial view city building night top down rooftops street lights || Must be in frame: A single ordinary urban building and its neighbours seen from directly above or a steep angle at night, rooftops and a street with a few lamps. No people, no text overlay, no daylight, no famous landmark, no readable signage.

services/city-map/public/images/drone/generic-building/02-thermal.jpg

02 kind: **THERMAL** source: stock

Caption: Rooftop thermal: nothing.

STOCK -- search for:

Search: thermal drone image building rooftop night infrared white hot || Must be in frame: A thermal or infrared aerial frame of a building roof and surrounding street in a white-hot or greyscale palette, no human heat signatures, no crosshair or on-screen data. Warm HVAC units or a chimney are fine; any person-shaped hot spot is not.

services/city-map/public/images/drone/generic-building/03-ground.jpg

03 kind: **GROUND** source: stock

Caption: Street level. No trace.

STOCK -- search for:

Search: empty city street night building entrance closed shutters street lamp || Must be in frame: A quiet street at night in front of an ordinary building: a closed entrance or shutter, a lamp, wet pavement, parked cars are fine. No people, no readable signage or logos, no daylight.

generic:coords -- Generic -- open ground or a street corner

services/city-map/public/images/drone/generic-coords/01-aerial.jpg

01 kind: **AERIAL** source: stock

Caption: Aerial pass, 60 m around the point.

STOCK -- search for:

Search: drone night aerial empty road intersection street corner open ground || Must be in frame: Open ground or a street corner seen from a drone at night: a road junction, a patch of waste ground or a field edge, a lamp or two. No people, no text overlay, no daylight, no landmark.

services/city-map/public/images/drone/generic-coords/02-thermal.jpg

02 kind: **THERMAL** source: stock

Caption: Thermal: nothing.

STOCK -- search for:

Search: thermal drone aerial night empty field road infrared greyscale || Must be in frame: A thermal aerial frame of open ground or a road in a white-hot or greyscale palette, uniform cool tones, no human heat signature, no on-screen data or reticle.

services/city-map/public/images/drone/generic-coords/03-ground.jpg

03 kind: **GROUND** source: stock

Caption: Ground level. No trace.

STOCK -- search for:

Search: empty street corner night lamp post wet road no people || Must be in frame: A ground-level night view of a street corner or open ground lit by one lamp or a flashlight, wet tarmac or grass. No people, no readable signs, no daylight.

generic:cave -- Generic -- the decoy caves (Quarry cave, Hermit's cave)

services/city-map/public/images/drone/generic-cave/01-aerial.jpg

01 kind: **AERIAL** source: stock

Caption: Cave mouth on the hillside. Searched 60 m around the point.

STOCK -- search for:

Search: cave entrance rocky hillside night flashlight aerial || Must be in frame: A dark cave opening in a rocky hillside or old quarry face at night, lit by a torch or drone light, scree and scrub around it. No people, no daylight, no text.

services/city-map/public/images/drone/generic-cave/02-thermal.jpg

02 kind: **THERMAL** source: stock

Caption: Thermal at the entrance: nothing.

STOCK -- search for:

Search: thermal infrared image cave entrance rock night greyscale || Must be in frame: A thermal frame of a cave or rock opening in a white-hot or greyscale palette: uniform cool rock, the opening a black void, no human heat signature, no reticle or on-screen data.

services/city-map/public/images/drone/generic-cave/03-ground.jpg

03 kind: **GROUND** source: stock

Caption: Cave mouth, ground level. No trace.

STOCK -- search for:

Search: cave entrance close up night torchlight rock || Must be in frame: A ground-level torch-lit view into a cave mouth, rock walls and floor, darkness beyond. No people, no daylight, no text or logos.
